

A SYSTEM AND METHOD FOR
AUTOMATICALLY SECURING DATA FOR
TRANSMISSION

ABSTRACT OF THE DISCLOSURE

A system and method for automatically encrypting and decrypting data for transmission. The process includes retrieving a file from a destination based transmit folder, encrypting the file, and transmitting the file to an outgoing folder for transmission to the destination. The file is encrypted with an encryption process associated with the destination based transmit folder. The process also includes retrieving a file from a destination based received folder, decrypting the file, and transmitting the file to an outgoing folder for access at the destination. The file is decrypted with a decryption process associated with the destination based received folder.
